Local Content Management within the Oil and Gas Industry

Course code: PQ136 From: 14-10-2024 Venue: London - Premier inn Victoria Course Fees: 4445 £

Introduction

Local Content refers to the development of local skills, the transfer of oil and gas technology, and the use of local labor and native manufacturing. The business benefits of developing the first components of an area content strategy, such as building a local workforce and supplier capacity, integrating local content with business plans, and successfully monitoring the programs, will be discussed in this Local Content Management within the Oil and Gas Industry training course. You'll gain practical insight into what works best for your region, whether you're developing your policy now or want to proportion your local content models.

This training will prepare you to understand and deliver local content in the context of oil and gas projects. It aims to help you build the local workforce and supplier capacity, as well as implement and sustain successful local content strategic plans. Furthermore, the training will provide oil and gas companies with practical advice on how to realize the potential value of local content, as well as suggestions for all stakeholders on how to help create shared value through local content development.

This training course will highlight:

- Key factors within the local content provisions
- Exploring a variety of themes, including skills development programs and native content performance management
- Identify and assess the impact of local content provisions over the execution of an oil field development project
- Participate in the elaboration of an area content management plan
- Negotiation of local content provisions applicable to a given contractual context
