Cash Calls in Oil and Gas Venture Operations

Course code: JV69 From: 28-10-2024 Venue: Bangkok (Thailand) - Course Fees: 4900 £

Introduction

Many universal and national oil and gas organizations are collaborating in Joint Venture (JV) projects in order to improve and produce oil and/or gas in an economically viable use. It also assists oil and gas organizations in mitigating risk at various stages of a department's lifecycle.

Every year, billions of dollars are spent on upstream projects.

This large amount of investment will be made primarily in accordance with the terms and conditions of Joint Operating Agreements (JOA), which require all shareholders to contribute funds to shared activities. Fundamentally, a Joint Venture agreement requires all shareholders to pay their share of expenses (either operating or capital) in response to a cash call by the director; however, if any of the investors fails to pay its share, the agreement terminates. Under the terms and conditions of the Joint Operating Agreements, such a failure will usually result in a "Default" (JOA).

This course is intended to explain the fundamentals of cash calling in joint venture contracts, including effective accounting procedures and reporting, cash models, fundamentals, and workflows for cash calling in joint venture contracts, outstanding cash calls and repayment options, and the impact of cash default on joint venture operations and profitability. The course also emphasizes critical outcomes related to oil and gas joint venture budgeting and auditing rules.

To illuminate the specialty application of the concepts in the course, both the structural aspects of cash calling and real-world case studies will be discussed.
