Project Risk Management & Compliance

Course code: PQ148 From: 21-10-2024 Venue: London - Premier inn Victoria Course Fees: 4445 £

Introduction

This training seminar will emphasize project risk management awareness in order to mitigate negative project impacts and improve project execution.

The ability to seize opportunities, minimize threats, and optimize results is central to project management. However, risk management is far too frequently treated as a reactive process, or worse, is not done at all. You will be better positioned to successfully deliver your projects on time, within budget, and with a transparent health, safety, and environmental record if you have a better understanding of the risks that will affect your projects and how to effectively manage them.

This Project Risk Management training course will amble you through the proactive approach to both threats and opportunities. The approach is based on a clear understanding of both qualitative and quantitative risk management approaches.

The highlights of this training course on Project Risk Management & Compliance are:

- Examine both the threats and opportunities facing your projects from both a top-down and bottom-up perspective employing a proven six-step risk management process
- Evaluate and answer risk at the project also because the task levels
- Anticipate possible causes of cost and schedule overruns, alongside poor quality of labor. By identifying the warning signs to those as early as possible within the project timely corrective action are often taken to attenuate or mitigate the impact
- An issue facing most projects is compliance; with both internal corporate policy and with government regulations. Failure to properly proceed during this area may result in costly schedule and budget problems on a project.

Course Objectives of Project Risk Management & Compliance

- Professionals, regardless of what your industry background are (i.e. engineering, information technology or business), this training course will cover both the elemental principles and modern techniques of project risk management

Course Outline of Project Risk Management & Compliance

DAY 1

Risk Management Framework and Planning

- Key Definitions
- The PMBOK Six Risk Management Processes
- Purpose & Benefits of Risk
- Responsibilities in Project Risk Management
- Integrating Risk Management into the Project Management Process
- Risk Management Planning
- Risk Planning Process

DAY 2

Risk Identification Processes

- Project Context & Stakeholders
- Risk Identification Inputs
- Risk Identification Tools & Techniques
- Risk Identification Outputs

DAY 3

Risk Assessment Process

- Project Estimating Techniques
- Schedule Diagramming - Critical Path Method (CPM)
- Project Evaluation & Review Technique (PERT)
- Qualitative Risk Analysis
- Quantitative Risk Analysis

DAY 4

Risk Response Plan Development

- Risk Prioritization
- Risk Response Strategy Guidelines
- Response Strategies for Threats & Opportunities
- Response Planning & Analysis
- Alternative Responses
- Response Validation
- Reserves - Contingency & Management

DAY 5

Risk Response Control

- Resource Management
- Risk Control Guidelines
- Risk Control Inputs
- Risk Control Tools & Techniques
- Risk Control Outputs
- Risk Reporting & Documenting
- Course Summation & Work Session Review
