Fundamentals of Asset Management

Course code: JV71 From: 05-08-2024 Venue: Paris - Course Fees: 4555 £

Introduction

Physical asset management is critical to the economies of many countries.

How we manage assets determines a company's effectiveness and how aggressive it is in the global market. A significant amount of money is spent each year on maintaining and developing the asset base, as well as providing services to improve it. Asset management has evolved into a highly competitive international market. Asset Management has been recognized as the key to enhanced investment decision-making across all divisions, from Oil & Gas, Defense, Aerospace, Manufacturing, Public Transport, and Electricity and Water Production & Distribution.

Regulators must enhance and present strategic Asset Management Plans that are aligned with corporate strategy.

The implementation of 'Good Asset Management Practice' will contribute to the achievement of the corporate strategy, and it is becoming increasingly important to demonstrate this by showing results.

This course will highlight:

- The basic principles of Asset Management are completely aligned with the IAM Qualifications
