 - Key Quality Principles; Responsibility for Quality
 - Quality Standards and Metrics
 - Project Monitoring Control and Quality Assurance Tools; Verification and Validation Processes
 - Introduction to Statistical Process Control (SPC) Tools: Pareto Analysis, Cause-and-effect Diagrams, Histograms, analysis, Scatter Diagrams, Process Control Charts, Process Capability, etc.
 - Managing Scope Creep, Hope Creep, Effort Creep, Feature Creep and other "creeps"
 - Correcting Project Delays
 - Quality Audits
 - Project Closure and Acceptance
 - End of Project Reviews and Benefit Realization Reviews; Lessons Learned

Day 4

Foundation Concepts

- Quality Defined
- Customer Focus
- Financial Focus
- Quality Management
- Process Management
- Cost of Quality

Day 5

Manage Quality

- Process Management
- Process Mapping
- Process Analysis
- Value Stream Mapping
- Standardization
- Visual Workplace and 5S
- Error Proofing (Poka-Yoke)
- Failure Mode and Effect Analysis
