# A Practical Workshop on Dealing with Construction Insurance

Course code: BA14 From: 24-02-2025 Venue: Kuala Lumpur - Course Fees: 4750 £

## Introduction

This training workshop, titled Construction Insurance - The A to Z of Handling Claims and Issuances, is designed to help delegates understand the key points of this important construction insurance commodity and coverage aspects. It is a contractual requirement that is frequently overlooked by project personnel and management as they prepare for site mobilization and physical work on the ground.

This workshop is led by an experienced and well-known subject facilitator who employs interactive training methods to enhance the training process. The participants will be informed of the technical aspects of the insurance coverage and further shown how claims are handled. The Contraction All Risks (CAR) and Erection All Risk (EAR) policies, both of which are claims under various local and international construction contracts, will serve as the locus for the two main documents (FIDIC, for example). Case studies will be used to assure that learning is effective and fairly enjoyable.

### This training will highlight the following key points:

- Considering Risk Desire and Concerns of the Underwriter when seeming at New Project Insurance
- Understand How Claims are Estimated and Managed by Several Insurance Companies
- Specialized Attention on Particular Clauses, Endorsements, and Warranties of the C.A.R. Policy
- Review Best Practices to obtain more Efficient Coverage from the Policy

## Course Objectives of a Practical Workshop on Dealing with Construction Insurance

### At the end of this workshop, you will acquire to:

- Know the Basic Principles of Insurance
- Discover how the Contraction All Risks (CAR) policy is used as a risk transfer mechanism
