Healthcare Procurement and Supply Chain Management

Course code: HM50 From: 23-12-2024 Venue: Manchester (UK) - Course Fees: 4445 £

Introduction

Supporting the best Procurement and Supply Chain Management training is a must for those working in the Healthcare division.

Due to the uncertainty of quantity, which has prompted real availability concerns across the industry, supplier-operator relationships have become extremely important.

To deal with the complexity of today's driving environment, it is critical that the Appropriation and Supply Chain roles collaborate their efforts and expertise.

The world as we knew it would not respond, and we would have to devise new methods of dealing with Procurement and Supply Chains.

This innovative and exciting training course will assist delegates in reevaluating their organization's Procurement and Supply Chain strategies in the near future. It will focus on real-time issues in order to counteract market changes and to think differently about global procurement. This training course is designed to provide delegates with practical strategies for transforming their organization's procurement team into a more ambitious and resilient team.

Course Objectives of Healthcare Procurement and Supply Chain Management

By attending this training course, the participants will be capable of:

- Reassess current Healthcare appropriation approaches
- Help relationships with vendors, companies, and countries
- Streamline methods
- Adopt contemporary exercises
- Develop robust internal supply outlining abilities
- Learn the devices and methods to efficiently renegotiate contracts

Course Methodology of Healthcare Procurement and Supply Chain Management

This exciting training course will be given by a distinguished world-class appropriation and supply chain expert and will involve a series of lively and interactive training techniques, including activities, role plays, case studies, practice sessions, and group discussions.

The training experience will be trained on instructor-led presentations that highlight key matters to focus on, and maintained by a reference manual including models of best practice.
